Frontend Technologies: Next.js, TypeScript, React.js, Redux, HTML, CSS, Axios, Material-UI, Formik, Yup, AOS, REST API

Tools: Git, GitHub, Postman, VS Code, Jira

WORK EXPERIENCE

Senior Frontend Developer   Nov 2024 - present

Ken Research

- Led and Mentored Junior Developers: Managed a team of 2 junior developers, providing guidance to ensure successful project delivery and skill development.
- Own end-to-end feature development, from technical planning to deployment.
- Evaluate and integrate new tools/libraries, staying current with industry trends and applying best practices.
- Ensure code quality and consistency by enforcing coding standards, linting, and test coverage.

Frontend Developer   Nov 2023 - Oct 2024

Ken Research

- Successfully migrated the entire technology stack from PHP to Next.js, improving performance, maintainability, and scalability.
- Optimized Web Performance: Implemented server-side rendering (SSR) and static site generation (SSG) to enhance site speed, reduce loading times, and improve overall user experience.
- Integrated Stripe payment gateway for smooth and reliable transactions
- Implemented secure user login and logout functionality
- Added LinkedIn login integration for easy user onboarding
- Nominated twice for the Ken Celestial Award and won once, in recognition of outstanding technical contribution and impact.

Frontend Developer, Intern   Aug 2023 – Oct 2023

Ken Research

- Created responsive web pages using HTML, CSS, JavaScript, and Bootstrap, based on provided designs and requirements.
- Developed and maintained user-facing features using PHP, contributing to the existing frontend codebase before the tech stack transition.
- Assisted in Tech Stack Migration: Supported the transition of the company's tech stack from PHP to Next.js, initially assisting and later taking on a more active role in development.

PROJECTS

E-commerce Application

- Built frontend with React and integrated backend via Node.js, improving data display speed by 50%.
- Implemented secure user login, product search, shopping cart, payments, and order tracking.

Live chat web app

- User Authentication & Messaging Features: Users can sign up and log in to their accounts, enabling individual and group chats with real-time messaging. They can express themselves using the latest emojis and manage their conversations with features like unread message indicators and personalized avatars.
- Responsive & Manageable Group Chats: The app offers a responsive design, ensuring a seamless experience on both desktop and mobile devices. Users can create, name, and edit group chats, fostering easy communication and collaboration within customizable spaces.
